### PROJECTS

- MShop - Clothing Collection Website**   
Built a visually appealing and responsive clothing collection website using **HTML, CSS, and JavaScript**. Features include product galleries, filter options, and a modern UI design, ensuring a seamless browsing experience for users.
- EKTA Enterprise Website**   
Developed a responsive website for EKTA Enterprise, a business focused on buying and selling carton and corrugated boxes. Built using **HTML, CSS, and JavaScript**, the site includes features like a downloadable product catalog, a WhatsApp integration for direct communication, and SEO optimization to enhance online visibility.
- Library Management System (LMS) Website**   
Designed and developed a comprehensive Library Management System featuring three distinct panels: User, Librarian, and Admin. Built using HTML, CSS, JavaScript, Bootstrap for responsive design, PHP for server-side scripting, and MySQL for database management. Enabled functionalities include book issue and return tracking, user management, and admin control for seamless library operations.

### OBJECTIVE

A self-driven Full Stack Developer with a solid academic foundation and strong technical skills, seeking a role to contribute to innovative projects and grow professionally.

### EDUCATION

BCA Computer Science07/2022 – 05/2025  
RK University79.89%

### SKILLS
